## **Workshop on Thoracic Radiology: A Pulmonologist's Perspective**

**February 22-23, 2020**

### **MESSAGE FROM ORGANIZERS**

The field of Pulmonology has witnessed remarkable advancements over last few years & the realm of a pulmonologist now overlaps with that of a pathologist, radiologist & an intensivist. This necessitates an understanding & mastering of radiological skills of a pulmonologist and this CME cum workshop has been planned keeping in mind thoracic radiology from a pulmonologist's perspective.

This 2-day workshop aims to hone the skills of a pulmonologist in terms of thoracic ultrasound including hands on session & computed tomography including both basic & advanced sessions.

This workshop gives an opportunity to learn how to utilise CT Scans to diagnose wide range of diseases from obstructive, infectious, restrictive to neoplastic.

We hope that this workshop proves to be a great learning experience & is able to enhance the much needed radiology skills of all participants.
