7. PERCENTILE SCORES

Percentile scores are scores based on relative performance of all those who appear for examination

Basically marks obtained are transformed into a scale ranging from 100 to 0 for each group of examinees.

Percentile Score indicates percentage of candidates that have scored EQUAL TO OR BELOW that particular Percentile in that examination.

Highest score is converted to a Percentile score of 100.

Marks obtained in between highest and lowest scores are also converted to appropriate Percentiles.

Percentile Scores would be converted to 3 decimal places to avoid bunching effect and therefore reduce ties.

Following is a further explanation of interpretation of scores in an examination with **100 candidates**.

- If candidate A's Percentile score is 100, it indicates that amongst those who have taken examination, 100% have scored their EQUAL TO OR LESS THAN candidate A. It also indicates that no candidate has scored more than candidate A.

- If candidate B's Percentile score is 90, it indicates that 90% of candidates who have taken examination have scored their EQUAL TO OR LESS than candidate B. It also indicates that remaining candidates have scored more than candidate B.

- If candidate C's Percentile score is 50, it indicates that 50% of candidates who have taken examination have scored their EQUAL TO OR LESS than candidate C. It also indicates that remaining half of those who took examination have scored more than candidate C.

- If candidate D's Percentile score is 30, it indicates that 30% of candidates who have taken examination have scored their EQUAL TO OR LESS than candidate D. It also indicates that remaining have scored more than candidate D.

• If candidate E's Percentile score is 1, it indicates that none of candidates who have taken examination have scored their EQUAL TO OR LESS than candidate E. It also indicates that all remaining candidates who took examination have scored more than candidate.
