

Training on indoor air and environmental quality at AIIMS, Rishikesh.

Training programme on Training on indoor air and environmental quality at AIIMS, Rishikesh for Clinical speciality, engineering staff, hospital administrators and nursing faculty and residents of AIIMS, Rishikesh was organised by Department of Medical Education on 20 Nov.2017. There were about 20 participants training in Medical Education hall. These candidates learned about Indoor environmental quality and basic principles of infection control as per Environmental Protection Agency.

Indoor environmental quality (IEQ) refers to the quality of a building's environment in relation to the health and wellbeing of those who occupy space within it. IEQ is determined by many factors, including lighting, air quality, and damp conditions. The present training focused on the introduction to indoor environmental quality, current scenarios and practise of HVAC and its maintenance, basic principles of infection control as per Environmental Protection Agency and next generation technologies for infection control in critical areas. The sessions were much appreciated by participants.
