

**Proposal for subscription of "Evidence based Clinical information for clinicians"**  
**electronic educational resource (UPTODATE – Wolters Kluwer)**

**Specifications :**

1. Should feature more than 9000+ evidence based graded recommendations that are graded and reviewed and checked by multiple authors and peer reviewers .
2. Should cover almost all medical specialties and provide more than 10,000+ clinical topics for reference.
3. It should have more than 1500 patient information topics and more than 25000+ graphic for use by the end user
4. It should also have provision for access of 150 + medical calculators and provide access to more than 5000 drug entries.
5. It should be set up in such a manner that the end user is able to use the electronic educational resource by remote access, for example if the user wishes to access the resource outside the institution, the user is able to do so and this remote access should be provided free of cost by the supplier.
