To Whom so this may concern

This is to Certify that " CoolTAB" A cold refrigerated flat surface used for Sorting & Labeling of Blood components under ideal ambient temperature and

" CoolTAB Junior " to be used for keeping blood bags at ambient temperature outside the Blood Bank fridge during crossmatch , donor group confirmation or issue counter.

1) CoolTAB & 2) CoolTAB Junior

both are proprietary products of M/s.Alliance Transfusion Pvt.ltd. No other company make or sell these products.

These products are designed by Alliance Transfusion after understanding the time and work pressures of busy blood bank settings, it would be fair to say that the temperature advantage provided by coolTAB is worth consideration.

We assure you of best services at all times,

Thanking you,

Yours sincerely,

For Alliance Transfusion Pvt.Ltd
