Govt. of India AIIMS, Rishikesh Notice Inviting e-Tender

The Executive Engineer, AIIMS Rishikesh on behalf of the Executive Director, AIIMS Rishikesh invites an item rate e-tenders for the enlisted contractor in the appropriate classes and category in CPWD, MES, and state government of Uttarakhand (PWD & IRRIGATION Department only) having an experience of the similar works from any government (State or Central or any autonomous body of the central government) for the work "Construction of VRDL Lab Phase 3 at AIIMS Rishikesh"

- 1.1 The work is estimated to Cost **Rs** 67,32,974.00, this estimate, however, is given merely as a rough guide.
- 1.2 Intending tenderer is eligible to submit the bid provided he has definite proof from the appropriate authority, which shall be to the satisfaction of the competent authority, of having satisfactorily completed similar works of magnitude specified below: -

Criteria of eligibility for submission of bid documents

1.2.1 Criteria of eligibility for the Experience

Experience of having successfully completed similar works during the last seven years ending last day of month previous to the one in which tenders are invited.

- (a) Three similar completed works each costing not less than 40% of the estimated cost put to tender,
- (b) Two similar completed works each costing not less than 60% of the estimated cost put to tender,
- (c) One similar completed work costing not less than 80% of the estimated cost put to tender.

Similar works means Experience of building construction work/Renovation work/Civil Maintenance Work.

The value of executed works shall be brought to current costing level by enhancing the actual value of work at simple rate of 7% per annum; calculated from the date of completion to last date of receipt of tenders.

1.2.2. Certificate of Registration for GST and acknowledgement of up to date filed return.

- 1.2.3. Certificate of work experience issued by the Government department/PSU. (As specified in Clause 1.2.1 of CPWD-6)
- 1.2.4. Valid enlistment certificate of Government department mentioned in the NIT.
- 1.2.5. Scanned copy of EMD in form of FDR/DD/online receipt and Contract/Bidder have to submit EMD in hard copy in a sealed envelope with clearly mentioning the Tender Id No. on or before the last date and time of submission of bid. Delay in the post or courier may be treated as disqualified.
- 2. Agreement shall be drawn with the successful bidders on prescribed Form No. CPWD 7 which is available as a Govt. of India Publication and also available on website www.cpwd.gov.in. Bidders shall quote his rates as per various terms and conditions of the said form which will form part of the agreement.

- 3. The time allowed for carrying out the work will be **150 Days** from the date of start as defined in schedule 'F' or from the first date of handing over of the site, whichever is later, in accordance with the phasing, if any, indicated in the bid documents.
- 4. The site for the work is available. The architectural and structural drawings shall be made available as per requirement of the same as per approved programme of completion submitted by the contractor after award of the work.
- 5 The tender document consisting of plans if any, specifications, the schedule of quantities of various types of items to be executed and the set of terms and conditions of the contract to be complied with and other necessary documents except Standard General Conditions Of Contract Form can be seen from website www.aiimsrishikesh.edu.in or https://eprocure.gov.in

The bid submitted shall be opened on 31-01-2024 on 03:00PM

- 6. The contractor whose bid is accepted will be required to furnish performance guarantee of 10 (Ten Percent) of the tendered amount within the period specified in Schedule F. This guarantee shall be in the form of cash (in case guarantee amount is less than Rs. 10000/-) or Deposit at Call receipt of any scheduled bank/Banker's cheque of any scheduled bank/Demand Draft of any scheduled bank/Pay order of any Scheduled Bank (in case guarantee amount is less than Rs. 1, 00,000/-) or Government Securities or Fixed Deposit Receipts or Guarantee Bonds of any Scheduled Bank or the State Bank of India in accordance with the prescribed form. In case the contractor fails to deposit the said performance guarantee within the period as indicated in Schedule 'F' including the extended period.
- 7. Intending Bidders are advised to inspect and examine the site and its surroundings and satisfy themselves before submitting their tenders as to the nature of the ground and sub-soil (so far as is practicable), the form and nature of the site, the means of access to the site, the accommodation they may require and in general shall themselves obtain all necessary information as to risks, contingencies and other circumstances which may influence or affect their bid. A bidder shall be deemed to have full knowledge of the site whether he inspects it or not and no extra charge consequent on any misunderstanding or otherwise shall be allowed. The bidders shall be responsible for arranging and maintaining at his own cost all materials, tools & plants, water, electricity access, facilities for workers and all other services required for executing the work unless otherwise specifically provided for in the contract documents. Submission of a bid by a bidder implies that he has read this notice and all other contract documents and has made himself aware of the scope and specifications of the work to be done and local conditions and other factors having a bearing on the execution of the work.
- 8. The competent authority does not bind itself to accept the lowest or any other bid and reserves to itself the authority to reject any or all the bids received without the assignment of any reason. All bids in which any of the prescribed condition is not fulfilled or any condition including that of conditional rebate is put forth by the tenderer shall be summarily rejected.
- 9. Canvassing whether directly or indirectly, in connection with bidders is strictly prohibited and the tenders submitted by the contractors who resort to canvassing will be liable to rejection.
- 10. The competent authority reserves to himself the right of accepting the whole or any part of the tender and the tenderer shall be bound to perform the same at the rate quoted.
- 11. The contractor shall not be permitted to tender for works in AIIMS Rishikesh in which his near relative is posted as Divisional Accountant or as an officer in any capacity between the grades of Executive Engineer and Junior Engineer (both inclusive). He shall also intimate the names of persons who are working with him in any capacity or are subsequently employed by him and who are near relatives to any gazette officer in AIIMS Rishikesh. Any breach of this condition by the contractor would render him liable to reject his Bid submitted by him.
- 12. This notice inviting Bid shall form a part of the contract document. The successful bidders /contractor, on acceptance of his tender by the Accepting Authority shall within 10 days from the stipulated date

of start of the work, sign the contract consisting of: -

- a) The Notice Inviting Bid, all the documents including additional conditions, specifications and drawings, if any, forming part of the tender as uploaded at the time of invitation of tender.
- b) Standard C.P.W.D. Form 7 or General condition of contract for C.P.W.D Maintenance work 2020 with up to date correction slips.
- 13. The valid solvency certificate of minimum 40% of the tendered amount issued by any nationalized bank under the governed by RBI.
- 14. The turnover certificate issued by the Charted Accountant having valid UDIN number of the last 3 years. The average turnover is the 50% percent of the tendered amount.
- 15. The bidder has to enclose the valid EPF and ESI certificate.
- 16. Completion certificate issued by Competent Authority will only be considered. Competent Authority means officer of not below the rank of Executive Engineer/ Equivalent would be acceptable.
- 17. Notarized copy of the registered partnership deed.

18. Valid Registration certificate of enlistment of contractor in the appropriate category in appropriate class as mentioned in above first para.

INTEGRITY PACT

To,

Sub: 15/SE/Civil/2023-24 Construction of VRDL Lab Phase 3 at AIIMS Rishikesh

Dear Sir,

It is here by declared that AIIMS Rishikesh is committed to follow the principle of transparency, equity and competitiveness in public procurement.

The subject Notice Inviting Tender (NIT) is an invitation to offer made on the condition that the Bidder will sign the integrity Agreement, which is an integral part of tender / bid documents, failing which the tenderer / bidder will stand disqualified from the tendering process and the bid of the bidder would be summarily rejected.

This declaration shall form part and parcel of the Integrity Agreement and signing of the same shall be deemed as acceptance and signing of the Integrity Agreement on behalf of the AIIMS Rishikesh.

Yours faithfully,

Executive Engineer AIIMS Rishikesh To,

The Executive Engineer, AIIMS Rishikesh,

Sub: Submission of Tender for the work of Construction of VRDL Lab Phase 3 at AIIMS Rishikesh

Dear Sir,

I / We acknowledge that AIIMS Rishikesh is committed to follow the principles thereof as enumerated in the Integrity Agreement enclosed with the tender/bid document.

I / We agree that the Notice Inviting Tender (NIT) is an invitation to offer made on the condition that I/We will sign the enclosed integrity Agreement, which is an integral part of tender documents, failing which I/We will stand disqualified from the tendering process. I/We acknowledge that THE MAKING OF THE BID SHALL BE REGARDED AS AN UNCONDITIONAL AND ABSOLUTE ACCEPTANCE of this condition of the NIT.

I/We confirm acceptance and compliance with the Integrity Agreement in letter and spirit and further agree that execution of the said Integrity Agreement shall be separate and distinct from the main contract, which will come into existence when tender/bid is finally accepted by AIIMS Rishikesh. I/We acknowledge and accept the duration of the Integrity Agreement, which shall be in the line with Article 1 of the enclosed Integrity Agreement.

I/We acknowledge that in the event of my/our failure to sign and accept the Integrity Agreement, while submitting the tender/bid, AIIMS Rishikesh shall have unqualified, absolute and unfettered right to disqualify the tenderer/bidder and reject the tender/bid is accordance with terms and conditions of the tender/bid.

Yours faithfully

(Duly authorized signatory of the Bidder)

To be signed by the bidder and same signatory competent / authorised to

sign the relevant contract on behalf of the Executive Director AIIMS Rishikesh.

INTEGRITY AGREEMENT

BETWEEN

'**Principal** / **Owner'**, which expression shall unless repugnant to the meaning or context hereof include its successors and permitted assigns)

AND

(Name and Address of the Individual/firm/Company) Through......(hereinafter referred to as the (Details of duly authorized signatory)

"**Bidder/Contractor**" and which expression shall unless repugnant to the meaning or context hereof include its successors and permitted assigns)

Preamble

WHEREAS the Principal /Owner has floated the Tender (NIT No.

.....) (hereinafter referred to as "**Tender/Bid**") and intends to award, under laid down organizational procedure, contract for

(Name of work)

Hereinafter referred to as the "Contract".

AND WHEREAS the Principal / Owner values full compliance with all relevant laws of the land, rules, regulations, economic use of resources and of fairness/transparency in its relation with its Bidder(s) and Contractor(s).

AND WHEREAS to meet the purpose aforesaid both the parties have agreed to enter into this Integrity Agreement (hereinafter referred to as "Integrity Pact" or "Pact"), the terms and conditions of which shall also be read as integral part and parcel of the Tender/Bid documents and Contract between the parties.

NOW, THEREFORE, in consideration of mutual covenants contained in this Pact, the parties hereby agree as follows and this Pact witnesses as under:

Article 1: Commitment of the Principal / Owner

- 1) The Principal/Owner commits itself to take all measures necessary to prevent corruption and to observe the following principles:
 - (a) No employee of the Principal/Owner, personally or through any of his/her family members, will in connection with the Tender, or the execution of the Contract, demand, take a promise for or accept, for self or third person, any material or immaterial benefit which the person is not legally entitled to.
 - (b) The Principal/Owner will, during the Tender process, treat all Bidder(s) with equity and reason. The Principal/Owner will, in particular, before and during the Tender process, provide to all Bidder(s) the same information and will not provide to any Bidder(s) confidential / additional inform
 - (c) ation through which the Bidder(s) could obtain an advantage in relation to the Tender process or the Contract execution.
 - (d) The Principal / Owner shall endeavour to exclude from the Tender process any person, whose conduct in the past has been of biased nature.
- If the Principal/Owner obtains information on the conduct of any of its employees which is a criminal offence under the Indian Penal code (IPC) / Prevention of Corruption Act, 1988 (PC Act) or is in violation of the principles herein mentioned or if there be a substantive suspicion in this regard, the Principal / Owner will inform the Chief Vigilance Officer and in addition can also initiate disciplinary actions as per its internal laid down policies and procedures.

Article 2: Commitment of the Bidder (s) / Contractor (s)

- It is required that each Bidder / Contractor (including their respective officers, employees and agents) adhere to the highest ethical standards, and report to the Government / Department all suspected acts of fraud or corruption or Coercion or or becomes aware, during the tendering process and throughout the negotiation or award of a contract.
- 2) The Bidder(s) / Contractor(s) commit himself to take all measures necessary to prevent corruption. He commits himself to observe the following principles during his participation in the Tender process and during the Contract execution:
 - a) The Bidder(s) / Contractor(s) will not, directly or through any other person or firm, offer, promise or give to any of the Principal / Owner's employees involved in the Tender process or execution of the Contract or to any third person any material or other benefit which he/she is not legally entitled to, in order to obtain in exchange any advantage of any kind whatsoever during the Tender process or during the execution of the Contract.
 - b) The Bidder(s) / Contractor (s) will not enter with other Bidder (s) into any undisclosed agreement or understanding, whether formal or informal. This applies in particular to prices, specifications, certifications, subsidiary contracts, submission or non-submission of bids or any other actions to restrict competitiveness or to cartelize in the bidding process.
 - c) The Bidder(s) / Contractor(s) will not commit any offence under the relevant IPC/PC Act.

Further the Bidder(s) / Contract(s) will not use improperly, (for the purpose of competition or personal gain), or pass on to others, any information or documents provided by the Principal/Owner as part of the business relationship, regarding plans, technical proposals and business details, including information contained or transmitted electronically.

- d) The Bidder(s)/ Contractor(s) of foreign origin shall disclose the names and addresses of agents / representatives in India, if any. Similarly, Bidder(s)/Contractor(s) of Indian Nationality shall disclose names and addresses of foreign agents/representatives, if any. Either the Indian agent on behalf of the foreign principal or the foreign principal directly could bid in a tender but not both. Further, in cases where an agent participates in a tender on behalf of one manufacturer, he shall not be allowed to quote on behalf of another manufacturer along with the first manufacturer in a subsequent/parallel tender for the same item.
- d) The Bidder(s)/ Contractor(s) will, when presenting his bid, disclose (with each tender as per performa enclosed) any and all payments he has made, is committed to or intends to make to agents, brokers or any other intermediaries in connection with the award of the Contract

3) The Bidder(s)/ Contractor(s) will not instigate third persons to commit offences outlined above or be an accessory to such offences.

- The Bidder(s) / Contractor(s) will not, directly or through any other person or firm indulge in fraudulent practice means a willful misrepresentation or omission of facts or submission of fake / forged documents in order to induce public official to act in reliance thereof, with the purpose of obtaining unjust advantage by or causing damage to justified interest of others and/or to influence the procurement process to the detriment of the Government interests.
- 5) The Bidder(s) / Contractor(s) will not, directly or through any other person or firm use Coercive Practices (means the act of obtaining something, compelling an action or influencing a decision through intimidation, threat or the use of force directly or indirectly, where potential or actual injury may befall upon a person, his / her reputation or property to influence their participation in the tendering process).

Article 3: Consequences of Breach

Without prejudice to any rights that may be available to the Principal/Owner under law or the Contract or its established policies and laid down procedures, the Principal / Owner shall have the following rights in case of breach of this Integrity Pact by the Bidder(s)/Contractor(s) and the Bidder / Contractor accepts and undertakes to respect and uphold the Principal / Owner's absolute right:

1) If the Bidder (s) / Contractor(s), either before award or during execution of Contract has committed a transgression through a violation of Article 2 above or in any other form, such as to put his reliability or credibility in question, the Principal/Owner after giving 14 days notice to the contractor shall have powers to disqualify the Bidder(s)/Contractor(s) from the tender process or terminate/determine the Contract, if already executed or exclude the Bidder/Contractor from future contract award processes. The imposition and duration of the exclusion will be determined by the severity of transgression and determined by the Principal/Owner. Such exclusion may be forever or for a limited period as decided by the Principal/Owner.

2) Performance Guarantee/Security Deposit:

If the Principal/Owner has disqualified the Bidder(s) from the Tender process prior to the award of the Contract or terminated/determined the Contract or has accrued the right to terminate/determine the Contract according to Article 3(1), the Principal/Owner apart from exercising any legal rights that may have accrued to the Principal/Owner, may in its considered opinion forfeit the entire amount of Earnest Money Deposit, Performance Guarantee and Security Deposit of the Bidder / Contractor.

3) Criminal Liability:

If the Principal/Owner obtains knowledge of conduct of a Bidder or Contractor, or of an employee or a representative or an associate of a Bidder or Contractor which constitutes corruption within the meaning of Indian Penal code (IPC)/Prevention of Corruption Act, or if the Principal/Owner has substantive suspicion in this regard, the Principal/Owner will inform the same to law enforcing agencies for further investigation.

Article 4: Previous Transgression

- The Bidder declares that no previous transgressions occurred in the last 5 years with any other Company in any country confirming to the anticorruption approach or with Central Government or State Government or any other Central/State Public Sector Enterprises in India that could justify his exclusion from the Tender process.
- 2) If the Bidder makes incorrect statement on this subject, he can be disqualified from the Tender process or action can be taken for banning of business dealings/ holding listing of the Bidder/Contractor as deemed fit by the Principal/ Owner.
- 3) If the Bidder/Contractor can prove that he has resorted / recouped the damage caused by him and has installed a suitable corruption prevention system, the Principal/Owner may, at its own discretion, revoke the exclusion prematurely.

Article 5: Equal Treatment of all Bidders/Contractors/Subcontractors

- 1) Bidder(s) / Contractor(s) undertake(s) to demand from all subcontractors a commitment The in conformity with this Integrity Pact. The Bidder / Contractor shall responsible for be any violation(s) of the principles laid down in this agreement/Pact by any of its Subcontractors/sub-vendors.
- 2) The Principal / Owner will enter into Pacts on identical terms as this one with all Bidders and Contractors.
- 3) The Principal / Owner will disqualify Bidders, who do not submit, the duly signed Pact between the Principal/Owner and the bidder, along with the Tender or violate its provisions at any stage of the Tender process, from the Tender process.

Article 6- Duration of the Pact

This Pact begins when both the parties have legally signed it. It expires for the Contractor / Vendor 12 months after the completion of work under the contract or till the continuation of

defect liability period, whichever is more and for all other bidders, till the Contract has been awarded.

If any claim is made/lodged during the time, the same shall be binding and continue to be valid despite the lapse of this Pacts as specified above, unless it is discharged/determined by the Competent Authority, Executive Director, AIIMS Rishikesh.

Article 7- Other Provisions

- This Pact is subject to Indian Law, place of performance and jurisdiction is the Head quarters of the Division of the Principal / Owner, who has floated the Tender.
- 2) Changes and supplements need to be made in writing. Side agreements have not been made.
- 3) If the Contractor is a partnership or a consortium, this Pact must be signed by all the partners or by one or more partner holding power of attorney signed by all partners and consortium members. In case of a Company, the Pact must be signed by a representative duly authorized by board resolution.
 - 4) Should one or several provisions of this Pact turn out to be invalid; the remainder of this Pact remains valid. In this case, the parties will strive to come to an agreement to their original intentions.
- 5) It is agreed term and condition that any dispute or difference arising between the parties with regard to the terms of this Integrity Agreement / Pact, any action taken by the Owner/Principal in accordance with this Integrity Agreement/ Pact or interpretation there of shall not be subject to arbitration.

Article 8:- Submission

Additional Performance Security may be applicable in case of bidder quoted the abnormal below rate which is decided by the competent authority. The abnormal below rate may also be decided by the competent authority and their decision may be final. Bidder/Contractor has also to submit the market rate analysis to carry out the work. Non-submission of the Additional performance guarantee in a stipulated time shall be treated as disqualified from the contract and bidder/contractor may also be debarred for the three years in further participation in any bid of any department AIIMS.

Article 9- LEGAL AND PRIOR RIGHTS

All rights and remedies of the parties hereto shall be in addition to all the other legal rights and remedies belonging to such parties under the Contract and/or law and the same shall be deemed to be cumulative and not alternative to such legal rights and remedies aforesaid. For the sake of brevity, both the Parties agree that this Integrity Pact will have precedence over the Tender / Contract documents with regard any of the provisions covered under this Integrity Pact.

IN WITNESS WHEREOF the parties have signed and executed this Integrity Pact at the place and date first above mentioned in the presence of following witnesses:

(For and on behalf of Principal/Owner)

(For and on behalf of Bidder/Contractor)

PARTICULAR SPECIFICATIONS <u>&</u> <u>SPECIAL CONDITIONS</u>

1. <u>GENERAL</u>

- 1.1 Wherever any reference to any Indian Standard Specifications of BIS occurs in the documents relating to this contract, the same shall be inclusive of all amendments issued there-to or revisions thereof, if any, up to the date of receipt of tenders.
- 1.2 The contractor shall work according to the programme of work as approved by the Engineer-incharge, for which purpose, the contractor shall submit a programme of the work within 15 days from the stipulated date of start of the work.
- 1.3 The contractor shall take instructions from the Engineer-in-charge for stacking of materials at site. No excavated earth or building materials shall be stacked on areas where the buildings, roads, services or compound walls are to be constructed.
- 1.5 Unless otherwise provided in the Schedule of quantities, the rates tendered by the contractor shall be all inclusive and shall apply to all heights, lifts, leads and depths of the building and nothing shall be payable to him on this account.
- 1.6 The working drawings appearing at para 8.1(iii) of conditions of contract in the form CPWD-8, shall mean to include both architectural and structural drawings respectively. The structural and architectural drawings shall be properly correlated before executing the work. In case of any difference noticed between architectural and structural drawings, final decision, in writing of the Engineer-in-charge shall be obtained by the contractor before proceeding further.
- 1.7 Some restrictions may be imposed by the security staff etc. on the working and for movement of labour, materials etc. The contractor shall be bound to follow all such restriction / instructions including issue of identity cards to all persons authorized by him to do work / visit the work site and nothing shall be payable on this account.
- 1.8 The contractor shall make his own arrangements for obtaining electric connections, if required, and make necessary payments directly to the department concerned.
- 1.9 The contractor shall conduct his work, so as not to interfere with or hinder the progress or completion of the work being performed by other contractor (s) or by the Engineer-in-Charge and shall as far as possible arrange his work and shall place and dispose of the materials being used or removed, so as not to interfere with the operations of other contractors, or he shall arrange his work with that of the others in an acceptable and coordinated manner and shall perform it in proper sequence to the complete satisfaction of Engineer-in-Charge. The contractor shall be responsible for any damage due to hindrance caused by him.
- 1.10 All the material related to the work execution shall be approved by Engineer-In-charge.
- 1.11 Any cement slurry added over base surface for bond or for continuation of concreting, for protecting reinforcement bars, its cost shall be deemed to have been included in the respective items, unless specified otherwise and nothing extra shall be payable nor extra cement shall be considered in the cement consumption on this account.
- 1.12 Stacking of materials and excavated earth including its disposal shall be done as per the directions of the Engineer-in-Charge. Double handling of materials or excavated earth if required at any stage shall have to be done by the contractor at his own cost.
- 1.13 No claim for idle establishment & labour, machinery & equipments, tools & plants and the like, for any reason whatsoever, shall be admissible during the execution of work as well as after its completion.
- 1.14 Only Stainless Steel screws shall be used unless otherwise specified.
- 1.15 Work shall be carried out in professional manner with finished product serving the intended purpose with specified strength, durability and aesthetics.

- 1.16 Work activities shall be executed in well thought out sequences such that consequent activities not adversely affecting previously done work. Nothing extra shall be payable to protect the works already done.
- 1.17 The contractor shall prepare all the needed shop drawings well in advance and get them approved before placing the order and execution of the item.
- 1.18 Contractor shall be able to claim bill only after issuing site clearance certificate from Junior Engineer & Assistant Engineer.
- 1.19 Contractor shall submit all material in store which is to be consumed according to specifications during execution of work. It will be further issued by concerned JE and AE according to daily requirement.
- 1.20 All materials to be used during work shall be got approved from engineer in charge.
- 1.21 All samples of material shall be got approved from engineer in charge before execution of work.
- 1.22 The contractor(s) shall inspect the site of work before tendering and acquaint himself with the site conditions and **no claim on this account** shall be entertained by the department.
- 1.23 The tender shall see the approaches to the site. In case any approach from main road is required at or existing approach is to be improved and maintained for cartage of materials by the contractor, the same shall be provided, improved and maintained by the contractor at his own cost.
- 1.24 Contractor shall take all precautionary measures to avoid any damage to adjoining property. All **necessary arrangement shall be made at his own cost.** Any damage caused by the contractor to the contractor to existing building/ installation / roads / boundary walls shall be made good by him (the contractor) at his own cost.
- 1.25 The contractor shall take all precautions to avoid accidents by exhibiting necessary caution board day and night, speed limit, red flags, red lights and proving barriers. He shall be responsible for all damages and accidents caused to existing / new work due to negligence on his part. No hindrances shall be caused to traffic, running of hospital services during the execution of the work.
- 1.26 Royalty at the prevailing rates whenever payable shall have to be paid by the contractor on the boulders, metal, shingle, sand and bajri etc. Or any other material collected by him for the work direct to revenue authorities and **the department shall pay nothing extra for the same**.
- 1.27 The contractor shall provide at his own cost suitable weighing, surveying and levelling and measuring arrangements as may be necessary at site for checking. All such equipment shall be got calibrated in advance from laboratory, approved by the Engineer-In-Charge. Nothing extra shall be payable on this account.
- 1.28 Contractor shall provide permanent bench mark, flags tops and other reference points for the proper execution of work and these shall be preserved till the end of work. All such reference points shall be in relation to the level and location, given in the Architectural and plumbing drawings.
- 1.29 Water tanks, taps, sanitary, water supply and drainage pipes, civil fittings and accessories should confirm to byelaws and municipal body / corporation where CPWD specifications are not available. The contractor should engage licensed plumbers for the work and get the materials (fixture /fittings) tested by municipal Body / Corporation authorities wherever required at his own cost.
- 1.30 The contractor shall give performance test of the entire installations as per the standing specifications before the work is finally accepted and completion certificate is recorded by the Engineer- In -Charge. Nothing extra whatsoever shall be payable to the contractor for the test.
- 1.31 Any cement slurry added over base surface for the continuation of concreting for better bond is deemed to have been included in the items and nothing extra shall be payable on this account, also the cement consumed on this account shall not be considered in theoretical consumption.

For RCC work, only factory made round type cover block shall be used.

26

- 1.32 The contractor shall bear all incidental charges for cartage, storage and safe custody of materials bought to site.
- 1.33 The work shall be carried out in accordance with the Architectural drawings and structural drawings, to be issued from time to time, by the Engineer-In-Charge. Before commencement of any item of work, the contractor shall correlate all the relevant architectural and structural drawings issued for the and satisfy himself that the information available there from is complete and unambiguous.

The discrepancy, if any, shall be brought to the notice of the Engineer-In-Charge before execution of the work. The contractor alone shall be responsible for any loss or damage occurring by the commencement of the work on the basis of any erroneous and or incomplete information.

- 1.34 Other agencies will also simultaneously execute and install the works of internal electrical installations, sub- station / generating sets, air- conditioning, lifts, etc. for the work and the contractor shall afford necessary facilities for the same. The contractor shall leave such recesses, holes, openings trenches etc. as may be required for such related works (for which inserts, sleeves, brackets, conduits, base plates, clamps etc. Shall be supplied free of cost by the department unless otherwise specifically mentioned) and the contractor shall fix the same at the time of casting of concrete, stone work and brick work, if required, and **nothing extra shall be payable on this account.**
- 1.35 All materials obtained from Govt. stores or otherwise shall be got checked by the Engineer-In-Charge or his any authorized supervisory staff on receipt of the same at site before use.
- 1.36 All material shall only be brought at site as per programme finalized with the Engineer-In-Charge. Any pre-delivery of the material not required for immediate consumption shall not be accepted and thus not paid for.
- 1.37 The architectural drawings given in the tender other than those indicated in nomenclature of the items are only indicative of the nature of the work and materials / fixtures involved unless otherwise specifically mentioned. However, the work shall be executed in accordance with the drawings duty approved by the Engineer-In –Charge. Architectural drawings are available in the office of Engineer-In-Charge and can be seen.
- 1.38 Normally contractors shall not be allowed to work at night. Work at night shall, however, be allowed if the site conditions / circumstances at night, no claim on this account shall be entertained. In such situations the contractor shall make available to the department proper means of transport such as vehicle at his own cost.
- 1.39 Existing drains, cables, pipes, over-head wires, sewer lines and similar services encountered in the course of execution of work shall be protected against the damage by the contractor's own expense. The contractor shall not store materials or otherwise occupy any part of the site in a manned likely to hinder the operation of such services. In no case such services should be stopped to the existing buildings.
- 1.40 The contractor shall be responsible for the watch and ward/ guard of the buildings, safety of all fitting and fixtures provided by him against pilferage and breakage during the period of installations and thereafter till the building is physically handed over to the department. No extra payment shall be made on this account.
- 1.41 The day to day receipt and issue accounts of different / brands of cement shall be maintained separately in the standard Performa by the Jr. Engineer of work and which shall be duly signed by the contractor or his authorized representative.
- 1.42 The contractor shall be fully responsible for the safe custody of materials brought by him issued to even though the materials are under double lock key system.
- 1.43 The contractor shall procure the required materials in advance so that there is sufficient time for testing of the materials and clearance of the same before use in the work. Any predelivery of the materials not required for immediate consumption shall not be resorted to. The contractor shall provide at his own cost suitable weighing and measuring arrangements at site for checking the weight / dimensions as may be necessary for execution of work.

- 1.44 No payment shall be made to the contractor for any damage caused by rain, floods, earthquake or any other natural causes whatsoever during execution of work. The contractor at his own cost will make the damages to the work good and no claim on this account shall be entertained.
- 1.45 For construction works which are likely to generate malba / rubbish to the tune of more than a truck load, contractor shall dispose of malba, rubbish & other unserviceable materials and **wastes at his own cost** to the notified specified dumping ground and under no circumstances these shall be stacked / dumped even temporarily, outside the construction premises.
- 1.46 Any damage done by the contractor to any existing work or work being executed by other agencies shall be made good by him at his own cost.
- 1.47 On the account of security consideration, there would be some restrictions, on the working hours, movement of vehicle for transportation of material and location of labour camp. The contractor shall be bound to follow all such restrictions and adjust the programme for execution of work.
- 1.48 The contractor shall also be required to follow the rules & restrictions imposed on working / movement/ stacking of materials by the local competent authority at all times. Nothing extra shall be payable on this account.
- 1.49 In case, there is any discrepancy between English version and corresponding Hindi version, if provided, then the provisions in English version will prevail.
- 1.50 The contractor will have to work as per schedule given by the Engineer-In-Charge.
- 1.51 The contractor shall remove all splashes from doors, windows and floors etc. if the contractor fails to remove the same 10% of gross value of the bills would be kept in deposit from each bill simultaneously.
- 1.52 The contractor submits the authenticated copies of itemized bills of the material which has to be entered in the M.A.S. Register viz steel, Cement, Bitumen, Paint water proofing material or any other item suggested by the technical sanction authority before settling payment.
- 1.53 The contractor shall pump the concrete wherever necessary to expedite the progress of work. Nothing extra shall be paid on this account.
- 1.54 Sample of building material, fitting and other articles required for execution of work shall be got approved from the Engineer-In-Charge before use in the work. The quantity of samples brought by the contractor shall be judge by standards laid down in the relevant BIS specification.
- 1.55 All material and fittings brought by the contractor to the site for use shall conform to the samples approved by the Engineer-In-Charge which shall be preserve till the completion of work. If a particular brand of material is specified in the item of work in schedule of quantity, the same shall be used after getting the same approved from Engineer-In-Charge. Wherever brand/quality of material is not specified in the items of work, the contractor shall submit the samples as per suggestive list of brand name given in the tender document /particular specifications for approval of Engineer-In-Charge. For all other items, materials and fitting carrying BIS mark shall be used with approval of Engineer-In-Charge. Wherever BIS marked material / fittings are not available, the contractor shall submit samples of material/fittings manufactured by firm of repute conforming to relevant specification or IS codes and use the same only after getting the approval of Engineer-In-Charge. To avoid delay, contractor should submit samples as stated above well in advance so as to give timely order for procurement. If any material, even though approved by Engineer-In-Charge is found defective or not conforming to specifications shall be replaced/removed by the contractor at his own risk and cost.
- 1.56 The contractor shall ensure quality construction in a planned and time in bound manner. Any sub-standard material/work beyond set-out tolerance limit shall be summarily rejected by the Engineer-In-Charge& contractor shall be bound to replace/ remove such sub-standard/defective work immediately.
- 1.57 BIS marked items (except cement and steel) required on the work shall be got tested. Only important tests shall be carried out. The frequency of such tests shall be 25% of the frequency specified in the CPWD specifications 2009 Vol. I to II with up to date correction slips. for certain items, if the frequency of test is not mentioned in CPWD specifications then relevant IS code shall be followed and tests shall be carried out @25% of frequency specified therein.

- 1.58 BIS marked materials except otherwise specified shall be subjected to quality test besides testing of other materials as per the specifications described for the item/material. Wherever BIS marked materials are brought to the site of work, the contractor shall furnish manufacturer's test certificate or test certificate from approved testing laboratory to establish that the material produced by the contractor for incorporation in the work satisfies the provisions of BIS codes relevant to the material and /or the work done.
- 1.59 Sample for testing –The contractor shall provide samples of materials required for testing free of charge. The cost of test shall be borne by the contractor / department in the manner indicate below: -
 - (a) By the contractor, if the results show that the material does not conform to relevant specifications.
 - (b) By the department, if the result show that the material conforms to relevant specifications. All other expenditure required to be incurred for talking samples, conveyance, packing etc. shall be borne by the contractor himself.
- 1.60 However, if any load testing or special testing is to be done for concrete whose strength is doubtful, the cost of the same shall be borne by the contractor.
- 1.61 All necessary tests as per the NIT/CPWD specifications/ relevant BIS codes shall be carried out on all the materials whether ISI marked or otherwise. Wherever NIT/CPWD specifications/relevant BIS Codes do not specify the frequency of tests, the same shall be carried out as per the directions of the engineer –in-charge. Nothing extra whatsoever shall be payable on this account.
- 1.62 The contractor shall ensure quality control measures on different aspects of construction methodologies to be adopted.
- 1.63 Lists of approved makes and brand of materials for civil works and sanitary works are annexed hereto. Makes and brands of materials specified therein shall only be used on the work. The contractor shall submit brand/ make of various materials to be used for the approval of Engineer-In-Charge along with samples.
- 1.64 All material shall be brought as per programme finalized with the Engineer-In-Charge. Any pre delivery of the material, not required for immediate consumption shall not be accepted and thus not paid for.
- 1.65 Samples including brand/quality of materials and fitting to be used in the work shall be got approved from the Engineer-In-Charge, well in advance of actual execution and shall be preserved till the completion of the work.
- 1.66 The rates for all items of work shall, unless clearly specified otherwise, include cost of all labor, material, tools, and plants and other inputs involved in the execution of the items and **nothing** extra shall be payable on this account.
- 1.67 The contractor shall quote all-inclusive rates against the items in the schedule of quantities and **nothing extra shall be payable for any of the conditions and specifications** mentioned in the tender document unless specially specified otherwise.
- 1.68 Unless otherwise specified in the schedule of quantities, the rates for all items, shall be considered as inclusive of pumping / bailing out water wherever necessary for which **no extra payment shall be made.**
- 1.69 The rate for all items, in which the use of cement is involved is inclusive of charges for curing.
- 1.70 The foundation trenches shall be kept free from water work below ground level are in progress.
- 1.71 The contractor shall indemnify the Govt. against any claims or obligation rising out of any damage to adjacent property, structure or to building work done by him.
- 1.72 In case service are encountered during excavation /earth work and such services are required to be shifted, the contractor is bound to carry out the shifting operation as per guidance/ instructions and with the approval of the Engineer-In-Charge. However, necessary payments shall be made in this regard as per provision of the agreement.
- 1.73 Many other agencies would be executing work simultaneously at site. The contractor shall maintain proper co-ordination with other agencies in maintaining progress of work. In case of any dispute, the decision of the Engineer-In-Charge shall be final and binding.
- 1.74 LABOUR CESS @ 1% OF THE GROSS VALUE OF THE WORK DONE WIL BE DEDUCTED FROM EACH RUNNING & FINAL BIL AS PER GOVT. NOTIFICATION.

1.75 RECOVERY FOR WATER @ 1% OF THE GROSS VALUE OF WORK DONE SHALL BE MADE FROM THE BILL.

- 1.76 THE CONTRACTOR COMPLIES WITH THE INSTRUCTION CONTAINED TO DPCC OREDER FOLLOWS:-
 - (a) The dismantle material /building rubbish received from dismantling/demolishing shall be dumped to the dumping ground in properly covered truck with precaution.
- 1.77 The agency has to deposit 50% of paint material before the start of work at site calculated as per theoretical consumption calculated.

2.0 <u>CONDITION FOR CEMENT</u>: -

2.1 The Contractor shall procure 43 grade Ordinary Portland cement (conforming to IS : 8112) or Portland slag cement (conforming to IS : 455) or Portland Pozzolana Cement (PPC) (Fly ash based) – conforming to IS : 1489 (Part-I) as required in the work, from reputed manufactures of cement such as ACC, Ultratech, Vikram, Shree Cement, Ambuja, Jaypee Cement, Century Cement & J.K. Cement or from any other reputed cement Manufacturer having a production capacity not less than one million tons per annum.

The tenderers may also submit a list of names of cement manufacturers which they propose to use in the work. The tender accepting authority reserves right to accept or reject name(s) of cement manufacture(s) which the contractor proposes to use in the work. No change in the tendered rates will be accepted if the tender accepting authority does not accept the list of cement manufactures, given by the tenderer, fully or partially.

Supply of cement shall be taken in 50 Kg bags bearing manufacture's name, batch No. & ISI marking. Samples of cement arranged by the contractor shall be taken by the Engineer-in-charge and got issue in accordance with provisions of relevant BIS codes. In case test results indicate that the cement arranged by the Contractor does not conform to the relevant BIS codes, the same shall stand rejected and shall be removed from the site by the Contractor at his own cost within a week's time of written order from the Engineer-in-charge to do so.

If Portland Pozzolana cement or Portland slag cement is used, suitable modification in deshuttering time etc. shall be done if need be as per specifications and standards and as directed by Engineer - in - charge and nothing extra shall be payable on this account.

No extra payment / deduction shall be made from the payment to the contractor for using any of the above type of cement.

- 2.2 The cement shall be brought at site in bulk supply of approximately 50 tonnes or as decided by the Engineer in charge.
- 2.3 For each grade / type, cement bags shall be stored in two separate godowns, one for tested cement and the other for fresh cement (under testing) constructed by the contractor at site of work as per sketch shown in General conditions of contract for CPWD works 2020 with weather proof roofs and walls, for which no extra payment shall be made. The size of the cement godown is indicated in the sketch for guidance only. The actual size of godown shall be as per site requirements and as per the direction of the Engineer in charge and nothing extra shall be paid for the same. The decision of the Engineer-in-charge regarding the capacity required/needed will be final. However, the capacity of each godown shall not be less than 100 tonnes. Each godown shall be provided with a single door with two locks. The keys of one lock shall remain with CPWD Engineer-in-charge or his authorized representative and that of other lock with the contractor at the site of work so that the cement is issued from godown according to the daily requirement with the knowledge of both the parties. The account of daily receipt and issue of cement shall be maintained in a register in the prescribed Proforma and signed daily by the contractor or his authorized agent in token of its correctness.
- 2.4 The cement shall be got tested by Engineer –in –charge and shall be used on the work only after satisfactory test results have been received. The contractor shall supply free of charge the cement required for testing including its transportation cost to testing laboratories. The cost of tests shall be borne by the contractor / Department in the manner indicated below: -

(a) By the contractor, if the results show that the cement does not conform to relevant BIS codes.

- (b) By the Department, if the results show that the cement conforms to relevant BIS codes.
- 2.4.1 All other charges of sampling, packing and transportation of sample shall also be borne by the contractors.
- 2.5 The actual issue and consumption of cement on work shall be regulated and proper accounts maintained separately for each type of cement, as provided in clause 10 of the contract. The theoretical consumption of cement shall be worked out as per procedure prescribed in Clause 42 of the contract and shall be governed by conditions laid therein. However, for consumption lesser beyond permissible theoretical variation recovery shall be made in accordance with conditions of contract at Schedule A to F (CPWD-7), without prejudice to action for acceptance of work/item at reduced rate or rejection as the case may be. In case of excess consumption, no adjustment shall be made.

(i) Cement brought to site and cement remaining unused after completion of work shall not be removed from site without return permission of the Engineer-in-charge.

(ii) Damaged cement shall be removed from the site immediately by the contractor on receipt of notice in written. In case if he does not do within three days or receipt of same notice, the Engineer-in-charge shall get removed at the site of the contractor.

2.6 Cement brought to site and cement remaining unused after completion of work shall not be removed from site without written permission of the Engineer-in-charge.

3.0 CONDITIONS FOR REINFORCEMENT STEEL: -

3.1 The contractor shall procure TMT bars of Fe 415 / Fe 415D / Fe 500/ Fe 500D / Fe 550 / Fe 550D grade from primary producers such as SAIL, Tata Steel Ltd., RINL, Jindal Steel & Power Ltd. and JSW Steel Ltd. or any other producer as approved by CPWD who are using iron ore as the basic raw material / input and having crude steel capacity of 2.0 Million tonnes per annum and above.

In case of non-availability of steel from primary producers, use of TMT reinforcement bars procured from secondary producers will be allowed subject to fulfillment of following conditions:

- a. The grade of the steel such as Fe-415 / Fe 415D / Fe 500D / Fe 550D / Fe 550D or other grade to be procured is to be specified as per BIS: 1786 2008.
- b. The secondary producers must have valid BIS license to produce HSD bars conforming to IS 1786: 2008. In addition to BIS license, the secondary producer must have valid license from either of the firms Tempcore, Thermex, Evcon Turbo & Turbo Quench to produce TMT Bars.
- c. The TMT bars procured from primary producers and ISPs shall conform to manufacture's specifications.
- d. The TMT bars procured from secondary producers shall conforms to the specifications as laid down by Tempcore, Thermex, Evcon, Turbo and Turboquench as the case may be.
- e. TMT bars procured either from primary producers or secondary producers, the specifications shall meet the provisions of IS 1786: 2008 pertaining to Fe 415 / Fe 415D / Fe 500 / Fe 550 / Fe 550D or other grade of steel as specified in the tender.
- 3.2 Samples shall also be taken and got tested by the Engineer-in-Charge as per the provisions in this regard in relevant BIS codes. In case the test results indicate that the steel arranged by the contractor does not conform to the specifications as defined under para (c) & (d) above, the

same shall stand rejected, and it shall be removed from the site of work by the contractor at his cost within a week time or written orders from the Engineer-in-Charge to do so.

In case contractor is permitted to use TMT reinforcement bars procured from secondary producers then:

(i) The base price of TMT reinforcement bars as stipulated under schedule 'F' shall be reduced by Rs. 6700/- MT. However, for operation of provisions of clause 10CA in such case, the indices for TMT reinforcement bars of secondary producers will be considered same as for primary producers.

(ii) The rate of providing & laying TMT reinforcement bars as quoted by the contractor in the tender shall also be reduced by Rs. 8.00 per kg.

- 3.3 The steel reinforcement bars shall be brought at site in bulk supply of 25 tonnes or more as decided by the Engineer in charge.
- 3.4 The steel reinforcement bars shall be stored by the contractor at site of work in such a way as to prevent distortion and corrosion and nothing extra shall be paid on this account. Bars of different sizes and lengths shall be stored separately to facilitate easy counting and checking.
- 3.5 For checking nominal mass tensile strength bend test re-bend test etc. specimen of sufficient length shall be cut from each size of the bar at random at frequency not less than that specified below:

Dia of bar	For consignment below	For consignment above 100tones
	100tones	
Under 10 mm	One sample for each 25 tonnes	One sample for each 40tonnes or
	or part thereof	part thereof
10 mm to	One sample for each 35 tonnes	One sample for each 45tonnes or
16mm	or part thereof	part thereof
Over 16mm	One sample for each 45 tonnes	One sample for each 50tonnes or
	or part thereof	part thereof

- 3.6 The contractor shall supply free of charge the steel required for testing including its transportation to testing laboratories. The cost of tests shall be borne by the contractor.
- 3.7 All other charges of sampling, packing and transportation of sample shall also be borne by the Contractor.
- 3.8 The actual issue and consumption of steel on work shall be regulated and proper accounts maintained as provided in clause 10 of the contract. The theoretical consumption of steel shall be worked out as per procedure prescribed in clause 42 of the contract and shall be governed by conditions laid therein. In case the consumption is less than theoretical consumption including permissible variations, recovery at the rate so prescribed shall be made. In case of excess consumption no adjustment need to be made.
- 3.9 Steel brought to site and remaining unused shall not be removed from site without the written permission of Engineer-in-Charge.
- 3.9(i) Reinforcement including authorized spacer bars and lap pages shall be measured in length for different diameters as actually (not more than as specified in the drawings) used in the work nearest to a centimeter. Wastage and unauthorized overlaps shall not be measured.

(ii) The standard sectional weights referred to shall be as in Table 5.4 in para 5.3.4 in revised CPWD specifications 2009 Vol. I will be considered for conversion of length of various sizes of TMT bars in to standard weight.

(iii) Record of actual sectional weights shall also be kept dia wise and lot wise. The average sectional weight for each diameter shall be arrived at from samples from each lot of steel received at site. The decision of the Engineer in charge shall be final for the procedure to be followed for determining the average sectional weight of each lot. Quantity of each diameter of steel received at site of work each day will constitute one single lot for the purpose. The weight of steel by conversion of length of various sizes of bars based on the actual weighted average sectional weight shall be termed as Derived Actual Weight.

(a) If the derived weight as in sub-para (iii) above is less than the standard weight as in sub-para (ii) above, then the Derived Actual Weight shall be taken for payment.

(b) If the derived actual weight is found more than the standard weight, than standard weight as worked out in sub para (ii) above shall be taken for payment. Nothing shall be paid extra for the difference in Derived/ Actual Weight and standard weight.

The contractor has to obtain vouchers and furnish test certificate to the Engineer-in-charge in respect of all the lots of Steel brought by him from approved suppliers at the site of work.

3.10 Every care should be taken to avoid mixing different types of grades of bars in the same structural members as main reinforcement to satisfy relevant clause of IS: 456. In case of buildings, wherever the situation necessitates, the changeover shall be permitted only from any one level onwards. In case of foundations, all foundation elements (footings and grade beams) shall have the same kind of steel. In the case of columns, all structural elements up to the level of change, where the changeover is taking place should have the same kind of steel as those in columns.

3.11 The reinforcing steel brought to site of work shall be stored on brick / timber platform of 30 / 40 - cm height, nothing extra shall be paid on this account.

4.0 SAFETY MEASURES AT CONSTRUCTION SITE

In order to ensure safe construction, following shall be adhered for strict compliance at the site: -

- (i) The work site shall be properly barricaded.
- (ii) Adequate signage's indicating 'Work in Progress Inconvenience caused is Regretted' or Diversion Signs shall be put on the sites conspicuously visible to the public even during night hours. These are extremely essential where works are carried out at public places in use by the public.
- (iii) The construction malba at site shall be regularly removed on daily basis.
- (iv) All field officials and the workers must be provided with safety helmets, safety shoes and safety belts.
- (v) Proper MS pipe scaffoldings with work platforms and easy-access ladders shall be provided at site to avoid accidents.

Necessary First-Aid kit shall be available at the site.

The above provisions shall be followed in addition to the provisions of General Condition of Contract.

5.0 SPECIFICATIONS FOR FLY ASH BRICKS - All fly ash bricks as brought to the site shall conform to the strength & durability parameters as prescribed in the tender and CPWD specifications.

6.0 The contractor shall submit 'Method Statement' for the approval soon after the award of work. 'Method Statement' is a statement by which the construction procedures for important activities of construction are stated, checked and approved. Method Statement shall have description of the item with elaborate procedures in steps to implement the same. The specification of the materials involved their testing and acceptance criteria, equipments to be used, precautions to be taken, mode of measurements etc.

6.1 Formwork for exposed concrete surfaces: -

6.1.1 Where it is specifically shown on the drawings to have original fair face finish of concrete surface without any rendering of plastering, formwork shall be carried put by using plywood on steel plates of approved quality.

6.1.2 The forms shall be constructed so as to produce a uniform and consistent texture and pattern on the face of the concrete. The formwork shall be placed so that all horizontals are constructed of lumber and are not paneled and the formwork joints shall be staggered.

6.1.3 To achieve a finish which shall be free of board marks, the formwork shall be faced with plywood or equivalent material in large sheets. The sheets shall be arranged in an approved pattern. Whenever possible, joints between sheets shall be arranged to coincide with architectural feature, sills, window heads or change in direction of surface. All joints between panels shall be vertical or horizontal unless otherwise directed. Suitable joints shall be approved between sheets. The joints shall be arranged and fitted so that no blemish or mark is imparted to the finished surfaces.

6.1.4 Forms for exposed concrete surfaces shall be constructed with grade strips (the underside of which indicate top of pour) at horizontal constructions joints, unless the use of groove strips is specified on the drawings. The reset forms shall be tightened against the concrete so that the forms will not be spread and permit abrupt irregularities or loss of mortar. Supplementary form ties shall be used as necessary to hold the reset forms tight against the concrete.

6.1.5 For fair faced concrete, the position of through bolts will be restricted and generally as indicated on the drawings.

6.1.6 Plywood and steel plates used in the formwork for obtaining exposed surfaces shall be got approved from Engineer-in-charge on each use. However, no forms will be allowed for reuse if it is doubtful to produce desired texture of exposed concrete.

6.1.7 Cement of only approved shade shall be used preferably of single lot to achieve integrity of texture.

6.2 Class of Surface Finish: -

6.2.1 For Beams & Slabs:

The finish shall be uniform, dense and smooth. no grout, no grain pattern, no crazing and no major blemishes shall be permitted. Abrupt irregularities not exceeding 3mm and gradual irregularities less than 5mm in 2m length only shall be permitted.

6.2.2 For Columns/Wall/Fins:

The finish shall be uniform and smooth leveling the surface of the compacted concrete shall be done with a screed board with power floating the surface and over that steel trowelling the surface under firm pressure characteristics of finish shall be brush marks < 3mm gradual irregularities less than 10mm in 2m.

6.3 Tolerance in Finished Concrete: -

The formwork shall be so made as to produce a finished concrete true to shape, lines, level, plumb and dimensions as shown in the drawings subject to the following tolerance unless otherwise specified in this specification or drawings.

6.4 WALL/COLUMN/FINS:

21.4.1 Variation from the plumb

21.4.2 Variation from the plumb of	$\pm 6 \text{mm}$	Upto 6m height
conspicuous liner		
21.4.3 Variation in the size of	(+)15mm	
wall openings	(-) 6mm	

- 21.4.4 Variation in parapet wall thickness
- (a) Upto 30cm thickness ± 6 mm

6.5 SLAB, BEAM & GIRDER FORMS:

21.5.1 Variation from the level or from the specified grid for beam soffit before removal of shores,

(a) In any 3m	$\pm 6 \text{mm}$
(b) In any 6m	$\pm 10 \text{mm}$

All the tolerances mentioned above shall apply to concrete dimensions only, and not to positioning of vertical steel or dowels. The tolerances given above are specified for local aberration in the finished concrete surface and should not be taken as tolerance for the entire structure taken as whole for the setting and alignment of formwork. Any error, within the above tolerance limits, or any other if noticed in any of the structure after part or portion stripping of forms, shall be corrected in the subsequent work to bring back the structure to its true line, level and alignment.

(SPECIMEN)

(Ref. para 3.3 of Particular Specifications and Special conditions)

GUARANTEE TO BE EXECUTED BY CONTRACTORS FOR REMOVAL OF DEFECT AFTER COMPLETION IN RESPECT OF WATER PROOFING WORKS

WHEREAS this agreement is supplementary to a contract (hereinafter called the Contract) dated and made between the **GUARANTOR** of the one part and the Government of the other part, whereby the Contractor, inter alia, undertook to render the buildings and structures in the said contract recited completely water and leak – proof.

AND WHEREAS **GUARANTOR** agreed to give a guarantee to the effect that the said structures will remain water and leak-proof for ten years from the date of giving of water proofing treatment.

NOW THE **GUARANTOR** hereby guarantees that water proofing treatment given by him will render the structures completely leak-proof and the minimum life of such water proofing treatment shall be ten years to be reckoned from the date after the maintenance period prescribed in the contract.

Provided that the guarantor will not be responsible for leakage caused by earthquake or structural defects or misuse of roof or alteration and for such purpose;

- (a) Misuse of roof shall mean any operation which will damage water proofing treatment, like chopping of firewood and things of the same nature which might cause damage to the roof;
- (b) Alteration shall mean construction of an additional storey or a part of the roof or construction adjoining to existing roof whereby proofing treatment is removed in parts;
- (c) The decision of the Engineer-in-charge with regard to cause of leakage shall be final.

During this period of guarantee the **guarantor** shall make good all defects and in case of any defect being found, render the building water –proof to the satisfaction of the Engineer-in-Charge at his cost, and shall commence the work for such rectification within seven days from the date of issue of the notice from the Engineer-in-Charge calling upon him to rectify the defects, failing which the work shall be got done by the Department by some other contractor at the **GUARANTOR'S** cost and risk. The decision of the Engineer-in-Charge as to the cost, payable by the **Guarantor** shall be final and binding.

That if **GUARANTOR** fails to execute the water proofing or commits breach thereunder then the **GUARANTOR** will indemnify the Principal and his successors against all loss, damage, cost, expense or otherwise which may be incurred by him by reason of any default on the part of the **GUARANTOR** in performance and observance of this supplementary agreement. As to the amount of loss and / or damage and / or cost incurred by the Government the decision of the Engineer – in – Charge will be final and binding on the parties.

IN WITNESS WHEREOF these presents have been executed by the Obligor and by and for and on behalf of the Executive Director, AIIMS Rishikesh on the day, month and year above written.

Signed, sealed and delivered by OBLIGOR in the presence of -

LIST OF APPROVED MATERIALS (CIVIL)

- Note :
 - 1. Unless otherwise specified, the brand/make of the material as specified in the item nomenclature or in the particular specifications or in the list of approved materials attached in the tender, shall be used in the work.
 - 2. The Contractor shall obtain prior approval from the Engineer-in-charge before placing order for any specific material/ Brand/ Make.
 - 3. Whenever the specified brand of material is not available than, the Engineer-in-charge may approve any material equivalent to that specified subject to proof being offered by the Contractor for its equivalence and its non-availability to his satisfaction.

	MATERIALS:	BRAND/MAKE
1	AAC Block	Aerocon, Siporex, Ultratech, Ecolite, Concrelite, J.K. Laxmi (Cement
		Ltd.), BILTECH, Kansal, Dlite Blocks
2	AAC Block Adhesive	Ferrous crete(Ferro-1188), ARDEX ENDURA (White Star), Ultratech
-		(Fixed-Block)
3	Acrylic Distemper, Emulsion, Synthetic	Asian Paints, ICI Dulux, Berger, Nerolac
5	Enamel Paint and Primer.	Asian Familis, Ter Dulux, Berger, Welolae
4	Epoxy Adhesive	FOSROC, Aquomix , Choksey, BAL-ENDURA, MYK Laticrete
5	Aluminium Composite Panel	Alpolic, Aluco Bond, Reynobond, Euro bond, Alstrong
6	Aluminium Extrusions	Hindalco, Indalco, Jindal
7	Aluminum Sections	Jindal, Hindalco, Indalco
8	Annealed Float Glass	Saint Gobain, Modi Guard, Asahi
9	Bitumen	Indian Oil, Hindustan Petroleum, Bharat Petroleum
10	Calcium Silicate Board / Tiles	Aerolite, Hilux, Starpan
11	CC Pavers / Grass Pavers	Nitco, Hindustan, Ultra, KJS Concrete, Duracrete, Mehtab Tiles, Kaptim
12	Centrifugally Cast Iron Pipe & Fittings	NECO, SKF, BIC, RIF, KAPILANSH, HIF
13	Ceramic Tiles	Kajaria, Nitco, Orient Bell, Johnson, RAK Ceramics
14	Chequered / Tactile Tiles	Dura, Eurocon, Modern, Hindistan, Johnson, Eavison
15	CI Manhole Cover	BIC, SKF, NICO, Hepco, Kapilansh, RIF
16	CI Double flanged non-return valves	Kirloskar, Sant, Kartar
17	CP fittings	Jaquar, Marc, Kohler, Grohe
18	CPVC Pipes & Fittings	Astral Flowguard, Ashirvad, Prince, Supreme, Finolex, VECTUS
19	Curtain Carrier / Drapery Rod	Marvel, Vista levlor, Johnson.
20	Dash fastener, Expansion Bolt	Hilti, Bosch Fischer
20	Hydraulic Door closer, Floor springs	Dorma, Hettich, Hafele, Geze
22	Ductile Iron Pipe (Water Supply)	Electro steel, Kesso, KDUPL, Electro Spun
	• • • • • • •	
23	EPDM Gasket	Hanu, Anand, Lescuyer
24	GRC / Tactile Tile	Unistone, Eurocon, Dazzle
25	Epoxy Grouting Compound	Pidilite, Ferrous Crete(Ferro-102), MYK LATICRETE, Fosrock
26	Epoxy Primer & Paints	Berger, Pidilite, CICO, BASF, SIKA, Fosrock
27	Fire Check door	Navair, Godrej, Shakti
28	Float Glass Mirror	Modifloat, Saint Gobain, Asahi
29	Flush Doors (ISI Mark only)	Century, Kitlam, Archid, Greenply, Marino, Duro, Gujcon
30	Friction Stay	Earl-Bihari, Geze, Hettich, Securistyle
31	Galvanized/Stainless Steel Anchor	Shakti, Arrow, Hilti, Fischer
	Fasteners	
32	GI Pipe & fittings	Tata, Zenith, Jindal, Prakash Surya, Swastik; (ISI Marked only)
33	GI Sheet	Sail, TATA, Jindal or equivalent
34	Gun Metal Gate Valve	Zoloto, Leader, SANT, Prima
35	Glass Mosaic Tile	Bisazza, Italia, Palladio, Mridul
36	Gypsum Board (False Ceiling)	Boral Gypsum, India Gypsum, St. Gobain
37	Hardener	Hardcrete of Snowcem India, Pidilite, CICO.
38	HDPE Pipes	VECTUS, Emco, Polyfins, Pioneer, Plyfab
39	Jet Assembly for EWC/Health Faucet	Parryware, Jaquar, Marc, PRIMA(ISI)

Schedule of Quantity

Name of work: Construction of VRDL Lab Phase 3 at AIIMS Rishikesh

Sr No.	ltem	Unit	Qty	Rate	Amount
1	Supply and Installation of sandwiched false ceiling of minimum 50 mm thickness both side Epoxy Powder coated (60-80 microns) 0.8mm thick G.I sheets (hot dipped with zinc coating of 120 gsm) with PUF as infill of density not less than 40+/-2 Kg/m3. Necessary stiffeners to be provided as per manufacturer's standard and complete in all respects including supports, hangers, sealants, complete with all accessories as required etc. Ceilings shall include cut-outs for Diffusers, Light fittings. Note: 1.All ceiling joints and gaps between panel to panel, ceiling elements (such as Diffusers, light fixtures etc.) to be sealed using silicon sealant. 2.Colour of the ceiling panel: As approved by Engineer-in-Charge. 3.Joint width between panels shall not exceed 3mm. 4.Seperate quantities for the ceiling cut-outs is	sqm	124.00		
2	 mentioned in BOQ. Supply and Installation of sandwiched wall panels of minimum 60 mm thickness both side Epoxy Powder coated (60-80 microns) 0.8mm thick G.I sheets (hot dipped with zinc coating of 120 gsm) with PUF as infill of density not less than 40+/-2 Kg/m3. Necessary stiffeners to be provided as per manufacturer's standard and complete in all respects including in-built MS/PVC conduits in each wall panel for electrical cabling, cut-outs for sockets & switches, Magnehelic Gauges etc. The entire wall panel assembly shall include Aluminium angular connectors between wall panels, Base runners (powder coated G.I.), complete with all accessories as required etc. Note: 1.All wall joints and gaps between panel to panel, wall elements(Magnehelic gauge, electrical socket, switch) etc. to be sealed using silicon sealant. 2.Colour of the wall panel: As approved by Engineer-in-Charge. 3.Joint width between panels shall not exceed 3mm. 4.Seperate quantise of wall openings mentioned in BOQ 	sqm	263.00		
3	Factory finished / Site made cut-outs in ceiling panel with necessary reinforcement/C caps, complete with all accessories as required etc. for fixing of Diffusers, Light Fixtures etc.	each	50.00		
4	Factory finished / site made cut-outs in wall panels with necessary reinforcement/C caps, complete with all accessories as required for fixing of electrical switch socket modules, Magnehelic gauges etc.	each	130.00		

1	Supply and installation of extruded aluminium with				
	epoxy powder coated (60-80 micron), clip on type				
	R-50 covings for the entire wall to wall and wall to				
5	ceiling joints including all accessories required for				
	fixing.				
	Note: All joints between clean room panels and				
	coving to be sealed using silicon sealant.	meter	400.00		
	Supply and installation of 3D Internal/External	ineter	100.00		
	corner coves of aluminium with epoxy powder				
	coated (60-80 micron) suitable for R-50 covings				
6	including all accessories required for fixing.	each	150.00		
	Note: All joints between clean room panels and				
	coving to be sealed using silicon sealant.				
	Supply and Installation of Clean room doors with				
	not less than 46mm thick door leaf and frames				
	equal to 60 mm thickness with properly levelled				
	replaceable view panel/glass. Both side Epoxy				
	Powder coated (60-80 microns) 0.8mm thick G.I				
	sheets(hot dipped with zinc coating of 120				
	gsm)with PUF as infill of density not less than 40+/-				
	2 Kg/m3. Door to be provided with necessary				
	stiffeners complete with, not less than 1.2 mm				
	thick epoxy powder coated GI sheet or with				
	anodized aluminium door frames totally flushed				
	with the wall panels, door bottom drop seal/				
	hinges with lifting arrangement ,SS304 Butt hinges				
	with ball bearings, Double glazed view panel				
_	(450x600 mm) with 6mm toughened (with 4 sided		10.00		
7	bevelled and smooth edges, with moisture traps	each	10.00		
	using silica gel between panes) with double				
	adhesive VHB tapes, SS 304 door closures, both				
	side SS304 'D' handle / push plate with D handle,				
	Both side SS kick plate, SS Lock & key, complete				
	with all accessories as required etc.				
	View Panel: Clear glass vision panel				
	Note:				
	1.All joints between view panel and door panel to				
	be sealed using silicon sealant.				
	2.Colour of the door panel: As approved by				
	Engineer-in-Charge.				
	3. Door accessories make shall be Dorma / Hafele.				
	Single leaf door size: 1200 mm (W) x 2100 mm (H)				
	(minimum 1100 mm clear opening)				
	Supply and Installation of Clean room doors with				
	not less than 46mm thick door leaf and frames				
	equal to 60 mm thickness with properly levelled				
	replaceable view panel/glass. Both side Epoxy				
	Powder coated (60-80 microns) 0.8mm thick G.I				
	sheets(hot dipped with zinc coating of 120				
	gsm)with PUF as infill of density not less than 40+/-				
	2 Kg/m3. Door to be provided with necessary stiffeners complete with, not less than 1.2 mm				
8	thick epoxy powder coated GI sheet or with	each	1.00		
0	anodized aluminium door frames totally flushed	eacii	1.00		
	with the wall panels, door bottom drop seal/

	SPLIT AC WORK				
	Supply, Installation, Testing and Commissioning of				
	2 TR Split AC 3 Star Inverter Type Hot & Cold with				
	indoor unit, outdoor unit, wireless remote, 3 metre				
	copper pipe with insulation & 3 metre suitable				
11	electrical cable for indoor to outdoor unit, drain	Nos.	3.00		
1				1	
	pipe etc. as per OEM standard. AC's shall have				
	pipe etc. as per OEM standard. AC's shall have				
	pipe etc. as per OEM standard. AC's shall have copper evaporator coil & copper condenser coil.				
12	pipe etc. as per OEM standard. AC's shall have copper evaporator coil & copper condenser coil. Make- Mitsubishi, Daikin, Hitachi & as approved by	Nos.	5.00		

		1	I	I	1
	indoor unit, outdoor unit, wireless remote, 3 metre				
	copper pipe with insulation & 3 metre suitable				
	electrical cable for indoor to outdoor unit, drain				
	pipe etc. as per OEM standard. AC's shall have				
	copper evaporator coil & copper condenser coil.				
	Make- Mitsubishi, Daikin, Hitachi & as approved by				
	Engineer in-charge				
	Supply, Installation, Testing and Commissioning of				
	extra Copper pipe (standard quality) both suction				
13	and discharge pipes inclusive i.e. ½"& ¼" copper	Meter	40.00		
10	pipes with individual nitrile rubber sleeve type 9	incee	10100		
	mm thick insulation for discharge and suction				
	pipes, all required accessories etc.				
	Supply and fixing of PVC pipe for condensate water				
	drain line with proper clamping, with all required				
14	accessories etc Drain line shall be not less than 1	Meter	60.00		
± 1	Inch dia PVC pipe and it has to be connected	Wieter	00.00		
	between split AC indoor unit and to the nearest				
	drainage point as per the site condition.				
	Supply and fixing of electric copper power cable of				
15	2.5 sq. mm 4 core with all required accessories etc.	Meter	45.00		
10	Make: Havells, Polycab, KEI & as approved by	inclei	15100		
	Engineer in-charge				
	Supply and fixing of pre-fabricated outdoor unit				
16	stand (Wall mount/floor mount) with all required	Nos.	6.00		
	accessories etc. as per site condition.				
	FIRE DETECTION AND ALARM SYSTEM				
	Supplying, installation, testing & commissioning of				
	heat detector operating at 54°C/57°C with rate of				
17	rise cum fixed temperature (dual thermistor) type	Each	4.00		
	with mounting base complete with all connection				
	etc. as required.				
	Supplying, installation, testing & commissioning of				
18	smoke detector with built-in LED and mounting	each	48.00		
10	base complete with all connections etc. as	each	48.00		
	required.				
	Supplying, installation, testing & commissioning of				
	manual call boxes of MS construction in surface/				
19	recess with stainless steel chain & hammer	each	3.00		
	assembly complete with glass and push button etc.				
	as required.				
	Supplying, installation, testing & commissioning				
20	response indicator on surface/ recess MS box	each	26.00		
20	having two LEDs metallic cover complete with all	cucii	20.00		
	connections etc. as required.				
	Supplying, installation, testing & commissioning				
	fire alarm sounder with facility to make				
21	announcement, mounted in M.S. box (16 SWG)	each	3.00		
21	with hinged cover plate & suitable for operation	each	5.00		
	with amplifier i/c line matching transformer etc.				
	complete as required.				
	Supplying, installation, testing & commissioning				
	sector panel suitable for following zones, complete				
	with visual indications for short circuit fault, open				
22	circuit fault, fire condition and all other standard	each	1.00		
	facilities as per IS:2189 with mimic diagram for all				
	area/ zone covered, complete with all connections,				
	interconnections as required. 4 zone				
		T .			
	Supplying & laying of 2x1.5 sqmm fire alarm				
23	Supplying & laying of 2x1.5 sqmm fire alarm armoured cable, 600/1000V rated with annealed	meter	243.59		

	wire armouring & FRLS outer sheath complete as			
	required			
	Electrical Item			
24	Wiring for light point/ fan point/ exhaust fan point/ call bell point with 1.5 sq.mm FRLS PVC insulated copper conductor single core cable in surface / recessed steel conduit, with modular switch, modular plate, suitable GI /PVC box and earthing the point with 1.5 sq.mm FRLS PVC insulated copper conductor single core cable etc. as required. Group C	Point	52.00	
25	Wiring for circuit/ submain wiring alongwith earth wire with the following sizes of FRLS PVC insulated copper conductor, single core cable in surface/ recessed steel conduit as required. 2 X 2.5 sq. mm + 1 X 2.5 sq. mm earth wire	meter	245.00	
26	Wiring for circuit/ submain wiring alongwith earth wire with the following sizes of FRLS PVC insulated copper conductor, single core cable in surface/ recessed steel conduit as required. 2 X 4 sq. mm + 1 X 4 sq. mm earth wire	meter	1398.00	
27	Wiring for circuit/ submain wiring alongwith earth wire with the following sizes of FRLS PVC insulated copper conductor, single core cable in surface/ recessed steel conduit as required. 2 X 10 sq. mm + 1 X 6 sq. mm earth wire	meter	11.00	
28	Wiring for circuit/ submain wiring alongwith earth wire with the following sizes of FRLS PVC insulated copper conductor, single core cable in surface/ recessed steel conduit as required. 4 X 10 sq. mm + 2 X 6 sq. mm earth wire	meter	22.00	
29	Supplying and fixing suitable size GI box with modular plate and cover in front on surface or in recess, including providing and fixing 3 pin 5/6 A modular socket outlet and 5/6 A modular switch, connections etc. as required.	each	50.00	
30	Supplying and fixing suitable size GI box with modular plate and cover in front on surface or in recess, including providing and fixing 6 pin 5/6 & 15/16 A modular socket outlet and 15/16 A modular switch, connections etc. as required.	each	80.00	
31	Supply, installation, testing and commissioning of exhaust fan in the existing opening, including making good the damage connection with existing light point/ fan point/ exhaust fan point/ call bell point with 3 x1.5 sq.mm flexible FRLS PVC insulated, copper conductor cable, body earthing and sundry materials complete with testing, commissioning etc.as required following specifications Size of fan (in mm) 300,Number of pole (in Nos.) 4,Number of blades 3,Rated voltage 230 V, 50 HZ, AC, Single Phase Upto 450 mm sweep	each	3.00	
32	Supply, installation, testing and commissioning of ceiling mounted down lighter LED fittings 2X2 square shape 36 W connection with existing light point/ fan point/ exhaust fan point/ call bell point with 3 x1.5 sq.mm flexible FRLS PVC insulated, copper conductor cable, body earthing and sundry materials complete with testing, commissioning etc.as required following specifications Main housing : CRCA,internal wiring : Industrial Grade Copper wire,hardware : SS / MS,Ingress protection	Nos.	34.00	

: IP20,lumen maintenance : 50000HR@70,Operating temperature : (0-50) Deg.	
C Dated voltage 9, frequency 240, 50kg	
C,Rated voltage & frequency : 240, 50hz	
AC,Wattage : 36 Watt,PF : >=0.95,	
ITHD,<10%,Luminous efficacy (lm/w) : >=120,CCT :	
>5700K, CRI : >80, operating voltage : 140V -	
300V,Lumen (lm) : 4000-4400,Surge Protection :	
>=2KV,Size MM : L 595 X W 595 X H (60 to	
80),Mounting :suitable for Armstrong/Grid	
ceiling, Driver location : External	
Supply, installation, testing and commissioning	
of ceiling mounted 15 Watt Round Slim Led Panel	
connection with existing light point/ fan point/	
exhaust fan point/ call bell point with 3 x1.5 sq.mm	
flexible FRLS PVC insulated, copper conductor	
cable, body earthing and sundry materials	
complete with testing, commissioning etc.as	
33required following specifications, 15 Watt RoundNos.5.00	
Slim Led Panel,Rated voltage -240V AC,Frequency-	
50Hz,Wattage - 15 Watt, Power factor - 0.9, CCT -	
6500K, Lumen Maintenance - 50000 Hrs. Main	
housing - Excellent Thermally Managed Presure Die	
cast Alluminium, Front Cover - Polycarbonate	
Diffuser,Cut out - 180 mm, Mount Type -	
Recess, Industrial type	
Supply, installation, testing and commissioning	
of 4 ft. surface LED fitting 18-20 watt	
connection with existing light point/ fan point/	
exhaust fan point/ call bell point with 3 x1.5 sq.mm	
flexible FRLS PVC insulated, copper conductor	
cable, body earthing and sundry materials	
34 complete with testing, commissioning etc.as Nos. 10.00	
required following specifications.2000 lumens full	
glow, powder coated alumiium die cast housing,	
with high effiency diffuser, CCT 5700-6500,	
system efficacy output not less than 110 lumens /	
watt, with electronic driver having PF>0.95 and	
THD < 10%, complete with electronicdriver,	
50000 hrs burning for lifetime.	
Supplying and fixing following way, single pole and	
neutral, sheet steel, MCB distribution board, 240 V,	
on surface/ recess, complete with tinned copper	
35 bus bar, neutral bus bar, earth bar, din bar, each 1.00	
35 interconnections, powder painted including each 1.00	
earthing etc. as required. (But without	
MCB/RCCB/Isolator) & as directed by Engineering	
Incharge. 12 way, Double door	
Supplying and fixing of following ways	<u> </u>
surface/recess mounting, vertical type, 415 V, TPN	
MCB distribution board of sheet steel, dust	
36 protected, duly powder painted, inclusive of 200 A each 1.00	
tinnedcopper bus bar, common neutral link, earth	
bar, din bar for mounting MCBs (but without MCBs	
and incomer) as required. & as directed by	
Engineering Incharge. 8 way (4 + 24), Double door	
Supplying and fixing of following ways	
surface/recess mounting, vertical type, 415 V, TPN	
MCB distribution board of sheet steel, dust	
37 protected, duly powder painted, inclusive of 200 A each 1.00	
tinnedcopper bus bar, common neutral link, earth	
	1
bar, din bar for mounting MCBs (but without MCBs and incomer) as required. & as directed by	

	Engineering Incharge. 12 way (4 + 36), Double door			
38	Supplying and fixing 5 A to 32 A rating, 240/415 V, 10 kA, "C" curve, miniature circuit breaker suitable for inductive load of following poles in the existing MCB DB complete with connections, testing and commissioning etc. as required & as directed by Engineering Incharge. Single pole	each	72.00	
39	Supplying and fixing 5 A to 32 A rating, 240/415 V, 10 kA, "C" curve, miniature circuit breaker suitable for inductive load of following poles in the existing MCB DB complete with connections, testing and commissioning etc. as required & as directed by Engineering Incharge. Double pole	each	1.00	
40	Supplying and fixing following rating, four pole, (three phase and neutral), 415 volts, Molded Case Circuit Breaker (MCCB), having a sensitivity current 30 mA in the existing MCB DB complete with connections, testing and commissioning etc. as required & as directed by Engineering Incharge. 63A	each	2.00	
41	Supplying and fixing 20 A, 240 V, SPN Industrial type socket outlet, with 2 pole and earth, metal enclosed plug top alongwith 20 A "C" curve, SP, MCB, in sheet steel enclosure, on surface or in recess, with chained metal cover for the socket out let and complete with connections, testing and commissioning etc. as required & as directed by Engineering Incharge.	each	8.00	
42	Earthing with copper earth plate 600 mm X 600 mm X 3 mm thick including accessories, and providing masonry enclosure with cover plate having locking arrangement and watering pipe of 2.7 metre long etc. with charcoal/ coke and salt as required.	set	1.00	
43	Supplying and laying 25 mm X 5 mm copper strip at 0.50 metre below ground as strip earth electrode, including connection/terminating with nut, bolt, spring, washer etc. as required. (Jointing shall be done by overlapping and with 2 sets of brass nut bolt & spring washer spaced at 50mm)	meter	25.00	
44	Supplying and installing following size of perforated painted with powder coating M.S. cable trays with perforation not more than 17.5%, in convenient sections, joined with connectors, suspended from the ceiling with M.S. suspenders including bolts & nuts, painting suspenders etc as required. suspenders etc as required. 150 mm width X 50 mm depth X 1.6 mm thickness	meter	5.00	
45	Supplying and installing following size of perforated painted with powder coating M.S. cable trays with perforation not more than 17.5%, in convenient sections, joined with connectors, suspended from the ceiling with M.S. suspenders including bolts & nuts, painting suspenders etc as required. suspenders etc as required. 300 mm width X 50 mm depth X 1.6 mm thickness	meter	5.00	
46	Supply, installation, testing and commissioning of 10KVA (3Ph-3Ph) Online UPS System with Inbuilt isolation Transformer-360V,12V/26AH -30 No's Batteries for 30Min Battery Backup and Battery Rack & Interlink Cables connection, testing,	Nos.	1.00	

		1	I	I	1
	commissioning etc. as required & as directed by				
	Engineering Incharge.				
	Providing and fixing following rating and breaking				
	capacity and pole MCCB with thermomagnetic				
47	release and terminal spreaders in existing cubicle	each	1.00		
47	panel board including drilling holes in cubicle	each	1.00		
	panel, making connections, etc. as required 125				
	A,36KA,FPMCCB				
	Providing and laying Autoclaved Aerated concrete				
	(AAC) blocks masonry with 150mm/230mm/300				
	mm thick with Grade-I AAC blocks of density 551 to				
	650 kg/ cum conforming to IS: 2185 (Part 3) in				
	super structure above plinth level up to floor V				
48	level with RCC band at sill level and lintel level with	cum	13.00		
	approved block laying polymer modified adhesive				
	mortar all complete as per direction of Engineer-in-				
	Charge. (The payment of RCC band and				
	reinforcement shall be made for seperately).				
	12 mm cement plaster of mix :1:6 (1 cement: 6 fine				
49		sqm	270.00		
	sand)				
	Providing and applying white cement based putty				
50	of average thickness 1 mm, of approved brand and	sqm	270.00		
	manufacturer, over the plastered wall surface to				
	prepare the surface even and smooth complete.				
	Wall painting with acrylic emulsion paint, having				
	VOC (Volatile Organic Compound) content less				
51	than 50 grams/ litre, of approved brand and	sqm	n 270.00		
	manufacture, including applying additional coats				
	wherever required, to achieve even shade and				
	colour Two coats				
	Kota stone slab flooring over 20 mm (average) thick				
	base laid over and jointed with grey cement slurry				
52	mixed with pigment to match the shade of the	sqm	200.00		
JZ	slab, including rubbing and polishing complete with	Sqiii	200.00		
	base of cement mortar 1 : 4 (1 cement : 4 coarse				
	sand) 25mm thick				
	Providing and fixing aluminium work for doors,				
	windows, ventilators and partitions with extruded				
	built up standard tubular sections appropriate Z				
	sections and other sections of approved make				
	conforming to IS: 733 and IS: 1285, fixing with dash				
	fasteners of required dia and size, including				
	necessary filling up the gaps at junctions, i.e. at				
	top, bottom and sides with required EPDM rubber/				
	neoprene gasket etc. Aluminium sections shall be				
53	smooth, rust free, straight, mitred and jointed	kg	100.00		
	mechanically wherever required including cleat				
	angle, Aluminium snap beading for glazing /				
	paneling, C.P. brass / stainless steel screws, all				
	complete as per architectural drawings and the				
	directions of Engineer-in-charge. (Glazing, paneling				
	and dash fasteners to be paid for separately) :For				
	fixed portion Powder coated aluminium (minimum				
	thickness of powder coating 50 micron)				
	For shutters of doors, windows & ventilators				
	including providing and fixing hinges/ pivots and				
	making provision for fixing of fittings wherever		20.00		
54	required including the cost of EPDM rubber /	kg	30.00		
	neoprene gasket required (Fittings shall be paid for				
	separately)Powder coated aluminium (minimum				
	thickness of powder coating 50 micron)				
55	Providing and fixing glazing in aluminium door,	sqm	60.00		
		-			

	1			1	I
	window, ventilator shutters and partitions etc. with				
	EPDM rubber / neoprene gasket etc. complete as				
	per the architectural drawings and the directions of				
	engineer-in-charge . (Cost of aluminium snap				
	beading shall be paid in basic item): With float				
	glass panes of 5 mm thickness (weight not less than				
	12.50 kg/ sqm)				
	Providing and fixing 12 mm thick prelaminated				
	particle board flat pressed three layer or graded				
	wood particle board conforming to IS: 12823 Grade I Type II, in panelling fixed in aluminum doors,				
56		cam	18.00		
50	windows shutters and partition frames with C.P. brass / stainless steel screws etc. complete as per	sqm	18.00		
	architectural drawings and directions of				
	engineerin- charge Pre-laminated particle board				
	with decorative lamination on both sides				
	Providing and fixing factory made uPVC white				
	colour casement/casement cum fixed glazed				
	windows comprising of uPVC multi-chambered				
	frame, sash and mullion (where ever required)				
	extruded profiles duly reinforced with 1.60 ± 0.2				
	mm thick galvanized mild steel section made from				
	roll forming process of required length (shape &				
	size according to uPVC profile), uPVC extruded				
	glazing beads of appropriate dimension, EPDM				
	gasket, stainless steel (SS 304 grade) friction				
	hinges, zinc alloy (white powder coated) casement				
	handles, G.I fasteners 100 x 8 mm size for fixing				
	frame to finished wall, plastic packers, plastic caps				
	and necessary stainless steel screws etc. Profile of				
	frame & sash shall be mitred cut and fusion welded				
	at all corners, mullion (if required) shall be also				
57	fusion welded including drilling of holes for fixing	sqm	45.00		
	hardware's and drainage of water etc. After fixing				
	frame the gap between frame and adjacent				
	finished wall shall be filled with weather proof				
	silicon sealant over backer rod of required size and				
	of approved quality, all complete as per approved				
	drawing & direction of Engineer-in-Charge. (Single /				
	double glass panes and silicon sealant shall be paid				
	separately). Variation in profile dimension in higher				
	side shall be accepted but no extra payment on this account shall be made. Casement window double				
	panels with top fixed with S.S. friction hinges (350 x				
	19 x 1.9 mm) made of (small series) frame 47 x 50				
	mm, sash 47 x 68 mm & mullion 47 x 68 mm				
	all having wall thickness of 1.9 ± 0.2 mm and single				
	glazing bead of appropriate dimension. (Area of				
	window upto 2.50 sqm)				
	Kota stone slabs 20 mm thick in risers of steps,				
	skirting, dado and pillars laid on 12 mm (average)				
F0	thick cement mortar 1:3 (1 cement: 3 coarse sand)	<u></u>	ГОО		
58	and jointed with grey cement slurry mixed with	sqm	5.00		
	pigment to match the shade of the slabs, including				
	rubbing and polishing complete.				
59	Demolishing koba in terracing and disposal of	CU 100	2.00		
צכ	material within 50 metres lead.	cum	2.00		
	Steel reinforcement for R.C.C. work including				
	Steer reinforcement for N.C.C. work including				
	straightening, cutting, bending, placing in position				
60	straightening, cutting, bending, placing in position and binding all complete above plinth level	kg	110.00		
60	straightening, cutting, bending, placing in position	kg	110.00		

61	Reinforced cement concrete work in beams, suspended floors, roofs having slope up to 15° landings, balconies, shelves, chajjas, lintels, bands, plain window sills, staircases and spiral stair cases above plinth level up to floor five level, excluding the cost of centering, shuttering, finishing and reinforcement with 1:1.5:3 (1 cement : 1.5	cum	1.50	
	coarsesand(zone-III) derived from natural sources : 3 graded stone aggregate20 mm nominal size derived from natural sources). Providing and laying APP (Atactic Polypropylene			
62	Polymer) modified prefabricated five layer, 3 mm thick water proofing membrane, black finished reinforced with glass fibre matt consisting of a coat of bitumen primer for bitumen membrane @ 0.40 litre/sqm by the same membrane manufactured of density at 25°C, 0.87 - 0.89 kg/litre and viscocity 70 - 160 cps. Over the primer coat the layer of membrane shall be laid using butane torch and sealing all joints etc., and preparing the surface complete. The vital physical and chemical parameters of the membrane shall be as under : Joint strength in longitudinal and transverse direction at 23°C as 350/300 N/5 cm. Tear strength in longitudinal and transverse direction as 60/80N. Softening point of membrane not less than 150°C. Cold flexibility shall be upto -2°C when tested in accordance with ASTM, D - 5147. The laying of membrane shall be got done through the authorised applicator of the manufacturer of membrane :	sqm	120.00	
63	Providing and laying in position cement concrete of specified grade excluding the cost of centering and shuttering - All work up to plinth level :1:5:10 (1 cement : 5 coarse sand (zone-III) derived from natural sources : 10 graded stone aggregate 40 mm nominal size derived from natural sources)	cum	1.00	
64	Providing and fixing to existing door frames. 25 mm thick PVC flush door shutters made out of a one piece Multi chamber extruded PVC section of the size of 762 mm X 25 mm or less as per requirement with an average wall thickness of 1 mm (± 0.3 mm). PVC foam end cap of size 23x10 mm are provided on both vertical edges to ensure the overall thickness of 25 mm. M.S. tube having dimensions 19 mm x 19 mm and 1.0 mm (± 0.1 mm) is inserted along the hinge side of the door. Core of the door shutter should be filled with High Density Polyurethane foam. The Top & Bottom edges of the shutter are covered with an end-cap of the size 25 mm X 11 mm. Door shutter shall be reinforced with special-polymeric reinforcements as per manufacturer's specification and direction of Engineer-in-charge to take up necessary hardware and fixtures. Stickers indicating the locations of hardware will be pasted at appropriate places	sqm	5.00	
65	Providing and fixing factory made P.V.C. door frame of size 50x47 mm with awall thickness of 5 mm, made out of extruded 5mm rigid PVC foam sheet, mitred at corners and joined with 2 Nos of 150 mm long brackets of 15x15 mm M.S. square tube, the vertical door frame profiles to be	meter	15.00	

		_			
	reinforced with 19x19 mm M.S. square tube of 19				
	gauge, EPDM rubber gasket weather seal to be				
	provided through out the frame. The door frame to				
	be fixed to the wall using M.S. screws of 65/100				
	mm size, complete as per manufacturer's				
	specification and direction of Engineerin-Charge.				
	Providing and laying Ceramic glazed floor tiles of				
	size 300x300 mm (thickness to be specified by the				
	manufacturer), of 1st quality conforming to IS :				
	15622, of approved make, in all colours, shades,				
66	except White, Ivory, Grey, Fume Red Brown, laid	sqm	35.00		
	on 20 mm thick bed of cement mortar 1:4 (1				
	Cement : 4 Coarse sand), jointing with grey cement				
	slurry @ 3.3 kg/ sq.m including pointing the joints				
	with white cement and matching pigments etc.,				
	complete.				
	Providing and fixing uPVC SWR pipes conforming to				
	IS:13592-92 Type B, including jointing with seal ring				
67	conforming to IS : 5382, leaving 10 mm gap for	meter	40.00		
	thermal expansion, (i) Single socketed pipes. 110				
	mm diameter				
	Providing and fixing white vitreous china pedestal				
	type water closet (European type W.C. pan) with				
	seat and lid, 10 litre low level white P.V.C. flushing				
	cistern, including flush pipe, with manually				
68	controlled device (handle lever), conforming to IS :	oach	2.00		
00		each	2.00		
	7231, with all fittings and fixtures complete,				
	including cutting and making good the walls and				
	floors wherever required :W.C. pan with ISI marked				
	white solid plastic seat and lid				
	Providing and fixing wash basin with C.I. brackets,				
	15 mm C.P. brass pillar taps, 32 mm C.P. brass				
	waste of standard pattern, including painting of				
69	fittings and brackets, cutting and making good the	each	2.00		
	walls wherever require:White Vitreous China Flat				
	back wash basin size 450x300 mm with single				
	15mm C.P. brass pillar tap				
	Providing and fixing Chlorinated Polyvinyl Chloride				
	(CPVC) pipes, having thermal stability for hot &				
	cold water supply, including all CPVC plain & brass				
	threaded fittings, including fixing the pipe with	meter	80.00		
70	clamps at 1.00 m spacing. This includes jointing of				
	pipes & fittings with one step CPVC solvent cement				
	and testing of joints complete as per direction of				
	Engineer in Charge.20 mm nominal outer dia Pipes				
	Providing and fixing C.P. brass long body bib cock				
71	of approved quality conforming to IS standards and	each	2.00		
'-	weighing not less than 690 gms. 15 mm nominal		2.00		
	bore				
	Providing and fixing wall mount health faucet of	7			
	chrome finish, handle material of ABS, of approved				
72	quality conforming to IS standards and weighing	each	2.00		
	not less than 250 gms with 1.2metre long pvc tube				
	and hook.				
	Providing and laying water proofing treatment in				
	sunken portion of WCs, bathroom etc., by applying				
73	cement slurry mixed with water proofing cement				
	compound consisting of applying : (a) First layer of				
	slurry of cement @ 0.488 kg/sqm mixed with water	sqm	10.00		
	proofing cement compound @ 0.253 kg/ sqm. This				
	layer will be allowed to air cure for 4 hours.(b)				
	Second layer of slurry of cement @ 0.242 kg/sqm			1	1

	mixed with water proofing cement compound @				
	0.126 kg/sqm. This layer will be allowed to air cure				
	for 4 hours followed with water curing for 48				
	hours. The rate includes preparation of surface,				
	treatment and sealing of all joints, corners,				
	junctions of pipes and masonry with polymer				
	mixed slurry.				
	Providing and laying integral cement based water				
	proofing treatment including preparation of				
	surface as required for treatment of				
	roofs,balconies, terraces etc consisting of following				
	operations: (a) Applying a slurry coat of neat				
	cement using 2.75 kg/sqm ofcement admixed with				
	water proofing compound conformingto IS. 2645				
	and approved by Engineer-in-charge over the				
	RCCslab including adjoining walls upto 300 mm				
	height including cleaning the surface before				
	treatment. (b) Laying brick bats with mortar using				
	broken bricks/brick bats 25 mm to 115 mm size				
	with 50% of cement mortar 1:5 (1cement : 5 coarse				
	sand) admixed with water proofing compound				
	conforming to IS : 2645 and approved by				
	Engineerin-charge over 20 mm thick layer of				
	cement mortar of mix 1:5 (1 cement :5 coarse sand				
) admixed with water proofing compound				
	conforming to IS : 2645 and approved by				
	Engineerin-charge to required slope and treating				
74	similarly the adjoining walls upto 300 mm height	sqm	122.00		
	including rounding of junctions of walls and slabs.	39.11	122.000		
	(c) After two days of proper curing applying a				
	second coat of cement slurry using 2.75 kg/ sqm of				
	cement admixed with water proofing compound				
	conforming to IS : 2645 and approved by Engineer-				
	in-charge.(d) Finishing the surface with 20 mm				
	thick jointless cement mortar of mix 1:4 (1 cement				
	:4 coarse sand) admixed with waterproofing				
	compound conforming to IS : 2645 and approved				
	by Engineer-in-charge including laying glass fibre	Í			
	cloth of approved quality in top layer of plaster and				
	finally finishing the surface with trowel with neat				
	cement slurry and making pattern of 300x300 mm				
	square 3 mm deep.(e) The whole terrace so				
	finished shall be flooded with water for a minimum				
	period of two weeks for curing and for final				
	test."All above operations to be done in order and				
	as directed and specified by the Engineer-in-Charge				
	:With average thickness of 120 mm and minimum				
	thickness at khurra as 65 mm.				
	Providing 2 mm thick ,PVC Vinyl flooring RQ				7
	Restorable Quality with a single layer of PVC, total				
	weight is 2800 gm/m2, PUR (polyurethane				
	reinforced, Abrasion group T: ≤4.00 mm, residual				
	indentation approx. 0.03 mm, castor wheel test				
	qualified, dimensional stability ≤0.40%, static				
	electrical charge < 2kv, impact sound reduction		400.00		
75	approx +4db, good resistance of scratch, slip,	sqm	190.00		
	chemical and fire, doesn't favor in growth of fungi				
	& bacteria. Clean Room class A certified. 100%				
	recyclable. Low VOC emissions after 28days of				
	installation (lower than $\leq 10\mu g/m^3$). Phthalate Free				
	of any colour and welding required at joints as per				
	direction of Engineer-in- charge.				
1		1	1	1	

	Self levelling of cement concrete flooring with				
76	desired chemicals as per direction of Engineer-in-	sqm	190.00		
	charge				
	Extra for providing PVC coving work on				
	edges/corners of room to avoid growth of		450.00		
77	microorganism by rounding of edges/corners.	meter	150.00		
	Corridor				
	Providing and fixing aluminium sliding door bolts,				
	ISI marked anodised (anodic coating not less than				
78	grade AC 10 as per IS : 1868), transparent or dyed	oach	10.00		
/8		each	10.00		
	to required colour or shade, with nuts and screws				
	etc. complete : 300x16mm				
	Providing and fixing aluminium tower bolts, ISI				
	marked, anodised (anodic coating not less than				
79	grade AC 10 as per IS : 1868) transparent or dyed	each	10.00		
	to required colour or shade, with necessary screws				
	etc. complete 300x10mm				
	Providing and fixing aluminium handles, ISI				
	marked, anodised (anodic coating not less than				
80	grade AC 10 as per IS : 1868) transparent or dyedto	Each	20.00		
	required colour or shade, with necessary screws	Lucii	20.00		
	etc. complete :125mm				
	Providing and fixing aluminium hanging floor door				
	stopper, ISI marked, anodised (anodic coating not				
81	less than grade AC 10 as per IS : 1868) transparent	each	10.00		
	or dyed to required colour and shade, with	cacii	10.00		
	necessary screws etc. complete. Twin rubber				
	stopper				
	Providing and fixing unplasticised P.V.C. connection				
	pipe with PTMT Nuts, collar and bush of approved				
82	quality and colour 15 mm nominal bore with 45 cm	each	6.00		
	length				
	Providing and fixing P.V.C. waste pipe for sink or				
0.2		aach	2.00		
83	wash basin including P.V.C. waste fittings complete	each	2.00		
	Flexible pipe 32mm dia				
	Providing and placing on terrace (at all floor levels)				
	polyethylene water storage tank, IS : 12701				
84	marked, with cover and suitable locking	Per	2000.00		
	arrangement and making necessary holes for inlet,	liter	2000.00		
	outlet and overflow pipes but without fittings and				
	the base support for tank.				
	Providing and fixing ball valve (brass) of approved				
85	quality, High or low pressure, with plastic floats	each	4.00		
	complete 15 mm nominal bore				
	Structural steel work in single section, fixed with or				
	without connecting plate, including cutting,				
86	hoisting, fixing in position and applying a priming	Kg	450.00		
	coat of approved steel primer all complete.				
	Painting with synthetic enamel paint of approved		4 5 6 5 5		
87	brand and manufacture to give an even shade :	sqm	150.00		
	Two or more coats on new work				
	Providing & Fixing multiwalled (multiwall) thermo				
	clear glass look type 16mm thick clear of required				
	color. Poly carbonate sheet of required brand such				
	as durotuff, Bayers or equivalent or approved by				
	engineer in charge. The poly carbonate sheet shall				
88	be fixed on tubular sheet structure/truss with the	sqm	30.00		
00	whole structure water tight as per approved	3411	50.00		
1	design/drawings. The polycarbonate sheet and				1
	profile shall be fixed with self tapping and self				

also include the rate of labour required for cutting and fixing of polycarbonate sheet in position required during execution of work. The work shall be completed in all respect as per design/drawings and direction of engineer in charge.		
TOTAL AMOUNT		67,32,974.00
