Department of Medical Education conducted a CME on “Occupational Hazards & vaccination” on 8 June 2017 between 3 to 5 Pm in Medical Education Hall. The first group trained included 43 faculty members.

Resource faculty for training programme was from Department of Biochemistry, Microbiology & Nuclear Medicine.

This was a session to educate concepts of occupational hazards with focus on ways to identify, Assess & control them. Sessions focused on physical, ergonomic, biological & nuclear hazards faced by Medical Professionals. Emphasized on correct ways of donning and removing personal protective gear and vaccination schedules essential for health care professional.

Physical, ergonomic and chemical hazard aspects were discussed by Dr Manisha Naithani, Associate Professor, Department of Biochemistry. She also emphasized on the hierarchy of control measures for dealing with occupational hazards. Dr Puneet Kumar Gupta, Assistant Professor, Department of Microbiology deliberated on biological hazards, including needle stick injuries and post exposure prophylaxis. Nuclear hazards were covered by Dr Vandana Kumar Dhingra, Associate Professor, Nuclear Medicine enumerating ways to minimize the exposure and check the exposure limits. At the end of session all the participants were by post-test assessment.
